Financial Planning and Analysis (FP&A) Systems

A financial planning and analysis (FP&A) system helps managers assess the company's future and know if they are reaching their performance goals. A complete FP&A system includes subsystems for (1) planning, (2) measuring and recording results, and (3) evaluating performance.

يساعد نظام التخطيط والتحليل المالي المديرين على تقييم مستقبل الشركة ومعرفة ما إذا كانوا قد وصلوا إلى أهداف الأداء الخاصة بهم. يشتمل نظام الكامل على أنظمة فرعية لـ (1) التخطيط ، (2) قياس النتائج وتسجيلها ، و (3) تقييم الأداء.

Purposes of Budgeting Systems

Budget

A detailed plan, expressed in quantitative terms, that specifies how resources will be acquired and used during a specified period of time.

الموازنة

خطة مفصلة ، معبراً عنها كمياً او
مالياً من خلالها ، يتم تحديد كيفية
الحصول على الموارد واستعمالها
خلال فترة زمنية محددة في
المستقبل

Purposes of Budgeting Systems

- | | |
|--|---------------------------------|
| 1. Planning | 1- التخطيط |
| 2. Facilitating Communication and Coordination | 2- تسهيل الاتصال والتنسيق |
| | 3- تخصيص الموارد |
| | 4- الرقابة |
| 3. Allocating Resources | 5- تقويم الاداء و تقديم الحوافز |
| 4. Controlling | |
| 5. Evaluating Performance and Providing Incentives | |

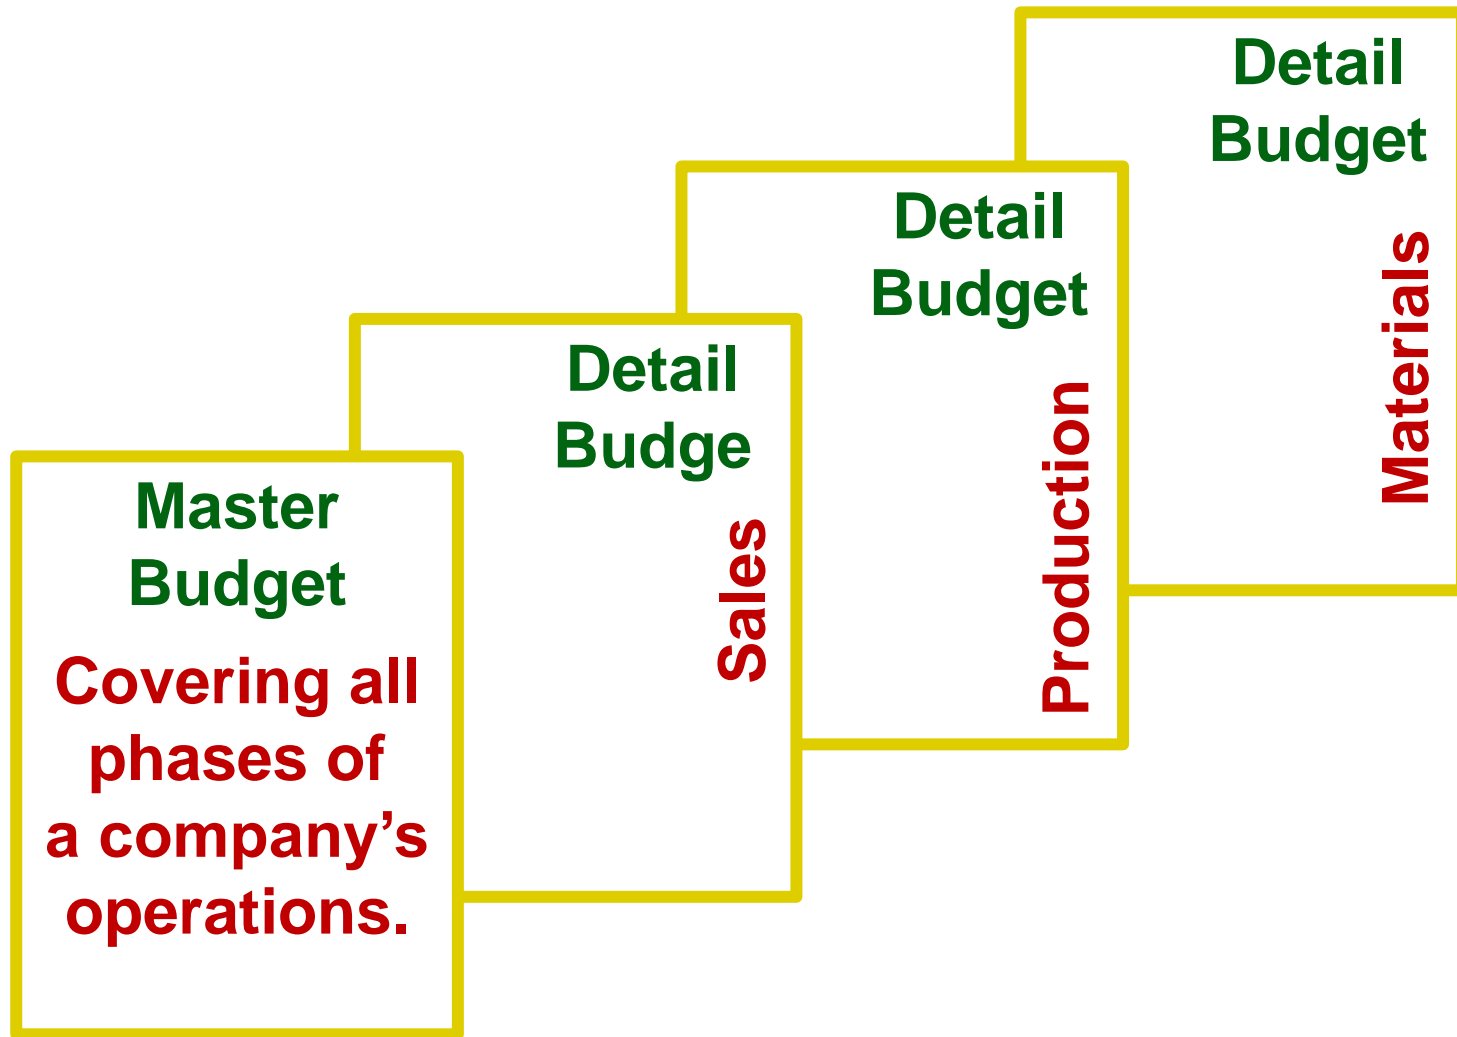

Types of Budgets (أنواع الموازنات)

Different types of budgets serve different purposes. A master budget, or profit plan, is a comprehensive set of detailed budgets covering all phases of an organization's operations for a specified period of time

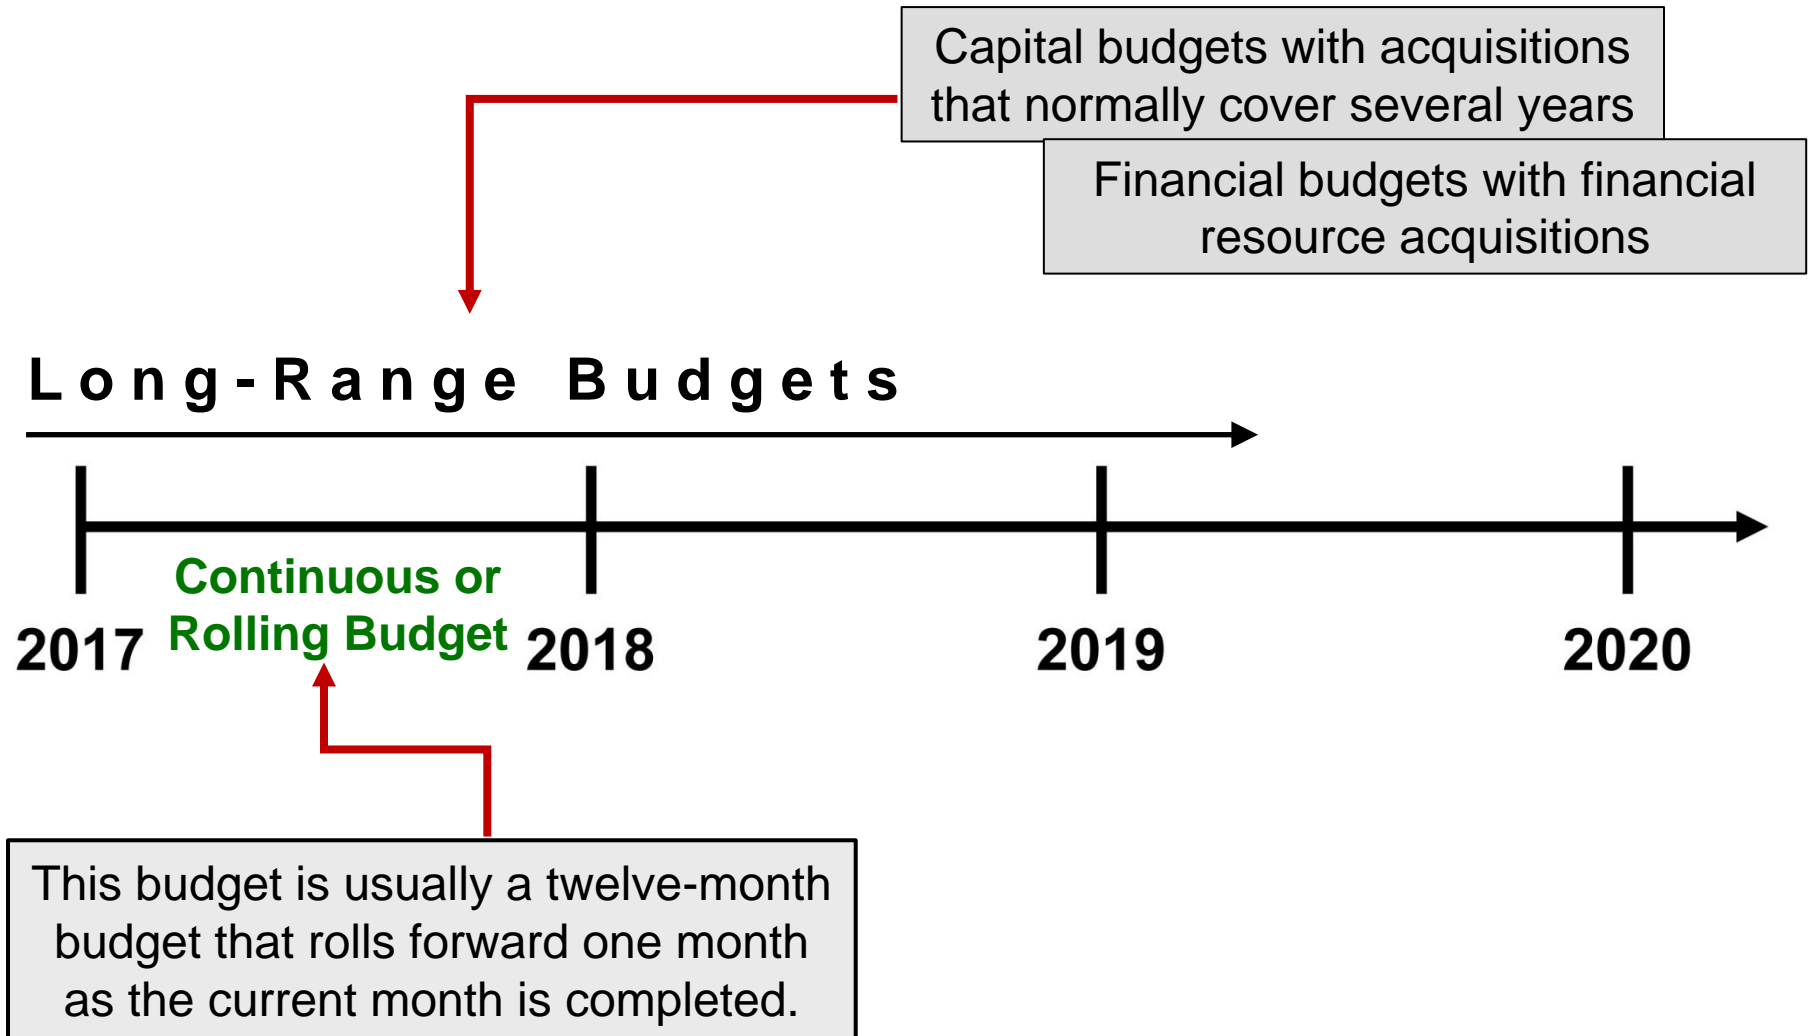

تخدم الأنواع المختلفة من الموازنات الشاملة أغراضًا مختلفة.

الموازنة الشاملة ، أو خطة الربح ، هي مجموعة شاملة من الموازنات التفصيلية التي تغطي جميع مراحل عمليات الوحدة الاقتصادية لفترة زمنية محددة

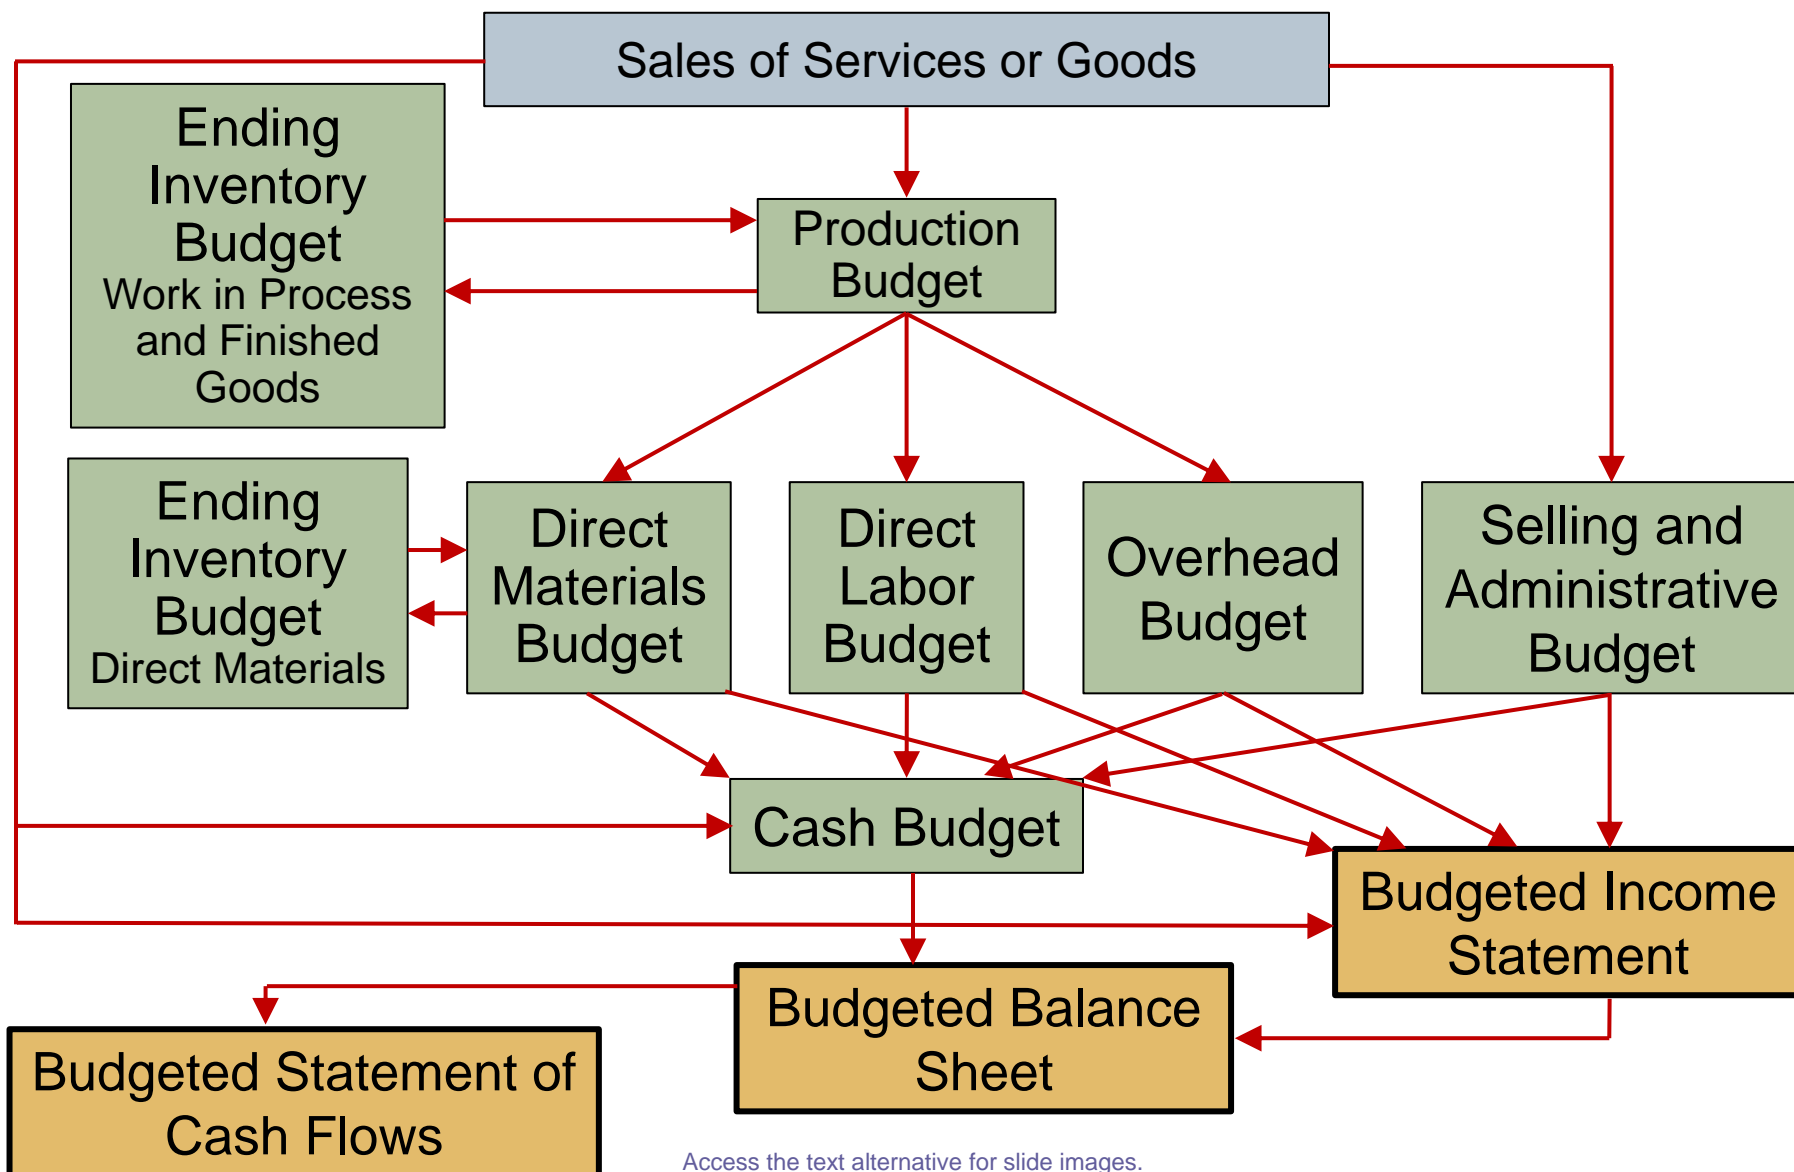

Types of Budgets(انواع الموازنات)

Long-Range Budgets

Components of a Master Budget

Sales Budget موازنة المبيعات

Breakers, Inc. is preparing budgets for the quarter ending June 30.

Budgeted sales for the next five months are:

| | |
|--------|---------------|
| April | 20,000 units |
| May | 50,000 units |
| June | 30,000 units |
| July | 25,000 units |
| August | 15,000 units. |

The selling price is \$10 per unit.

Sales Budget موازنة المبيعات

| | April | May | June | Quarter |
|------------------------|------------------|-------------------|-------------------|---------------------|
| Budgeted sales (units) | 20,000 | 50,000 | 30,000 | 100,000 |
| Selling price per unit | \$ 10 | \$ 10 | \$ 10 | \$ 10 |
| Total Revenue | <u>\$200,000</u> | <u>\$ 500,000</u> | <u>\$ 300,000</u> | <u>\$1 ,000,000</u> |

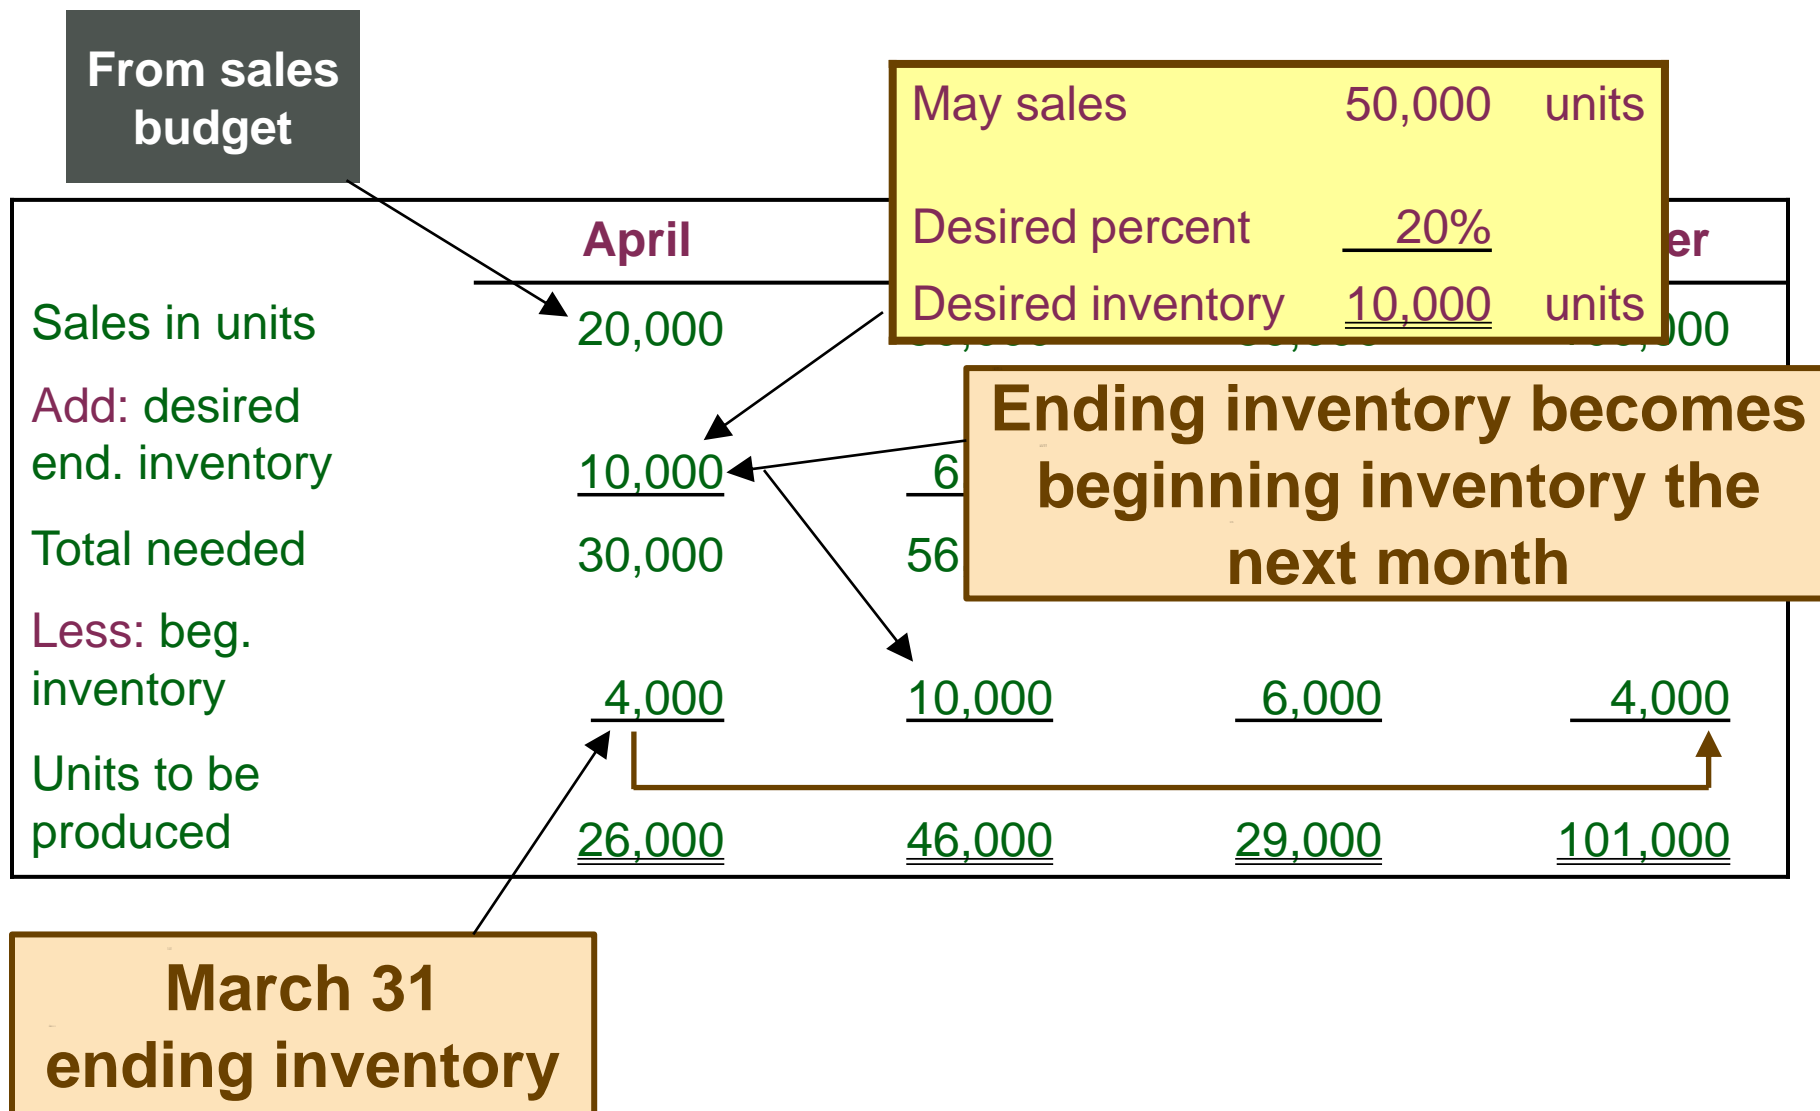

Production Budget موازنة الانتاج

Now that the sales budget is complete, the production budget can be prepared. The purpose of the production budget is to ensure that production meets budgeted sales and provides sufficient ending inventory. Production must be adequate to meet budgeted sales and provide for sufficient ending inventory.

The management of Breakers, Inc. wants ending inventory to be equal to 20% of the following month's budgeted sales in units. On March 31, 4,000 units were on hand .Let's prepare the production budget.

Production Budget = Sales in units +
desired end. Inventory - beg. inventory

Production Budget

Sales Budget

Illustration: Hayes Company

- Expected sales volume: 3,000 units in the first quarter with 500-unit increases in each succeeding quarter.
- Sales price: \$60 per unit.

| | Sales Budget | | | | |
|-------------------------|---------------------------------------|-----------|-----------|-----------|-----------|
| | For the Year Ending December 31, 2020 | | | | |
| | Quarter | | | | |
| | 1 | 2 | 3 | 4 | Year |
| Expected sales in units | 3,000 | 3,500 | 4,000 | 4,500 | 15,000 |
| Unit selling price | × \$60 | × \$60 | × \$60 | × \$60 | × \$60 |
| Total sales | \$180,000 | \$210,000 | \$240,000 | \$270,000 | \$900,000 |

Production Budget

Illustration

Hayes believes it can meet future sales needs with an ending inventory of 20% of next quarter's budgeted sales volume.

| Production Budget by Quarter | | | | | |
|---|--------------|--------------|--------------|--------------|---------------|
| For the Year Ending December 31, 2020 | | | | | |
| | 1 | 2 | 3 | 4 | Year |
| Expected sales in units | 3,000 | 3,500 | 4,000 | 4,500 | |
| Add: Desired finished Goods units | 700 | 800 | 900 | 1,000 | |
| Total required units | 3,700 | 4,300 | 4,900 | 5,500 | |
| Less: Beginning Finished goods units | 600 | 700 | 800 | 900 | |
| Required production units | 3,100 | 3,600 | 4,100 | 4,600 | 15,400 |

EXERCISE 1

Paige Company estimates that unit sales will be 10,000 in quarter 1, 14,000 in quarter 2, 15,000 in quarter 3, and 18,000 in quarter 4. Using a sales price of \$70 per unit, prepare the sales budget by quarters for the year ending December 31, 2020

| | 1 | 2 | 3 | 4 | year |
|-----------------------------|---------------|---------------|----------------|----------------|----------------|
| Budgeted Sales(unit) | 10000 | 14000 | 15000 | 18000 | 57000 |
| S.P (\$) | 70 | 70 | 70 | 70 | 70 |
| Total sales | 700000 | 980000 | 1050000 | 1260000 | 3990000 |

EXERCISE 2

Sales budget data for Paige Company are given in **EXERCISE 1**. Management desires to have an ending finished goods inventory equal to 25% of the next quarter's expected unit sales. Prepare a production budget by quarters for the first 6 months of 2020.

| | Quarter 1 | Quarter 2 | |
|-----------------------------|-----------|-----------|-------|
| Sales in units | 10000 | 14000 | 24000 |
| Add: desired end. inventory | 3500 | 3750 | 3750 |
| Total needed | 13500 | 17750 | 27750 |
| Less: beg. inventory | 2500 | 3500 | 2500 |
| 17 | 11000 | 14250 | 25250 |

DO IT! 2: Sales, Production, and DM Budgets

Sales data

Soriano Company is preparing its master budget for 2020. Relevant data pertaining to its sales, production, and direct materials budgets are as follows.

Sales. Sales for the year are expected to total 1,200,000 units. Quarterly sales, as a percentage of total sales, are 20%, 25%, 30%, and 25%, respectively. The sales price is expected to be \$50 per unit for the first three quarters and \$55 per unit beginning in the fourth quarter. Sales in the first quarter of 2021 are expected to be 10% higher than the budgeted sales for the first quarter of 2020.

DO IT! 2: Sales, Production, and DM Budgets

Production and Direct materials data

Production. Management desires to maintain the ending finished goods inventories at 25% of the next quarter's budgeted sales volume.

Direct materials. Each unit requires 3 pounds of raw materials at a cost of \$5 per pound. Management desires to maintain raw materials inventories at 5% of the next quarter's production requirements. Assume the production requirements for the first quarter of 2021 are 810,000 pounds.

DO IT! 2: Sales, Production, and DM Budgets

Sales Budget

Prepare a **sales**, production, and direct materials budgets by quarters for 2020.

| Sales Budget | | | | | |
|---------------------------------------|----------------------|----------------------|----------------------|----------------------|----------------------|
| For the Year Ending December 31, 2020 | | | | | |
| | Quarter | | | | |

Master Budget

اعداد

د. حسين كريم الشمري

Pargo Company is preparing its master budget for 2020. Relevant data pertaining to its sales, production, and direct materials budgets are as follows

Sales. Sales for the year are expected to total 1,000,000 units. Quarterly sales are 20%, 25%, 25%, and 30%, respectively. The sales price is expected to be \$40 per unit for the first three quarters and \$45 per unit beginning in the fourth quarter. Sales in the first quarter of 2021 are expected to be 20% higher than the budgeted sales for the first quarter of 2020.

Production. Management desires to maintain the ending finished goods inventories at 25% of the next quarter's budgeted sales volume.

Direct materials. Each unit requires 2 pounds of raw materials at a cost of \$12 per pound. Management desires to maintain raw materials inventories at 10% of the next quarter's production requirements.

Assume the production requirements for first quarter of 2021 are 450,000 pounds.

Prepare the sales, production, and direct materials budgets by quarters for 2020.

- $Q1 = 1000000 * 20\% = 200000$
- $Q2 = 1000000 * 25\% = 250000$
- $Q3 = 1000000 * 25\% = 250000$
- $Q4 = 1000000 * 30\% = 300000$

- 2021
- $Q1 = 200000 * 1.2 = 240000$

Sales Budget

For the Year Ending December 31, 2020

| | 1 | 2 | 3 | 4 | year |

Manufacturing Overhead Budget

Problem data

Hayes Company expects variable costs to fluctuate with production volume on the basis of the following rates per direct labor hour: indirect materials \$1.00, indirect labor \$1.40, utilities \$0.40, and maintenance \$0.20. Thus, for the 6,200 direct labor hours to produce 3,100 units, budgeted indirect materials are \$6,200 ($6,200 \times \1), and budgeted indirect labor is \$8,680 ($6,200 \times \1.40). Hayes also recognizes that some maintenance is fixed. The amounts reported for fixed costs are assumed.

Prepare a Manufacturing Overhead Budget.

Selling and Adm. Expense Budget

- Projection of anticipated operating expenses
- Distinguishes between fixed and variable costs

Illustration: Variable expense rates per unit of sales are sales commissions \$3 and freight-out \$1. Variable expenses per quarter are based on the unit sales from the sales budget (Illustration 9-3). Hayes expects sales in the first quarter to be 3,000 units. Fixed expenses are based on assumed data.

Prepare a selling and administrative expense budget.

Exercises

Atlanta Company is preparing its manufacturing overhead budget for 2020. Relevant data consist of the following.

Units to be produced (by quarters): 10,000, 12,000, 14,000, 16,000.

Direct labor: time is 1.5 hours per unit.

Variable overhead costs per direct labor hour:

indirect materials \$0.80 ; indirect labor \$1.20; and maintenance \$0.50.

Fixed overhead costs per quarter: supervisory salaries \$35,000; depreciation \$15,000; and maintenance \$12,000.

Instructions

Prepare the manufacturing overhead budget for the year, showing quarterly data.

Exercises

Kirkland Company combines its operating expenses for budget purposes in a selling and administrative expense budget. For the first 6 months of 2020, the following data are available.

1. Sales: 20,000 unit quarter 1; 22,000 unit quarter 2.
2. Variable costs per dollar of sales: sales commissions 5%, delivery expense 2%, and advertising 3%.
3. Fixed costs per quarter: sales salaries \$12,000, office salaries \$8,000, depreciation \$4,200, insurance \$1,500, utilities \$800, and repairs expense \$500.
4. Unit selling price: \$20.

Instructions

Prepare a selling and administrative expense budget by quarters for the first 6 months of 2020.

KIRKLAND COMPANY

Exercises

Fultz Company has accumulated the following budget data for the year 2020.

1. Sales: 30,000 units, unit selling price \$85.
2. Cost of one unit of finished goods: direct materials 1 pound at \$5 per pound, direct labor 3 hours at \$15 per hour, and manufacturing overhead \$5 per direct labor hour.
3. Inventories (raw materials only): beginning, 10,000 pounds; ending, 15,000 pounds.
4. Selling and administrative expenses: \$170,000; interest expense: \$30,000.
5. Income taxes: 30% of income before income taxes.

Instructions

- a. Prepare a schedule showing the computation of cost of goods sold for 2020.
- b. Prepare a budgeted multiple-step income statement for 2020

FULTZ COMPANY

Computation of Cost of Goods Sold

For the Year Ending December 31, 2020

| | |
|---|-----------|
| Cost of Goods Sold unit of finished goods | |
| direct materials =1 pound * \$5 per pound | 5 |
| direct labor 3 hours * \$15 per hour | 45 |
| manufacturing overhead \$5 * 3 | 15 |
| Total Cost of Goods Sold (65 * 30000) =1950000 | 65 |

FULTZ COMPANY

Budgeted Income Statement

For the Year Ending December 31, 2020

| | |
|-------------------------------------|-----------|
| Sales (30000 * 85) | 2550000 |
| Cost of Goods Sold | (1950000) |
| Gross profit | 600000 |
| Selling and administrative expenses | (170000) |
| Income form operation | 430000 |
| interest expense | (30000) |
| Income before taxes | 400000 |
| Income taxes (400000* 30%) | 120000 |

P22.1A (LO 2, 3) Cook Farm Supply Company manufactures and sells a pesticide called Snare. The following data are available for preparing budgets for Snare for the first 2 quarters of 2020.

1. Sales: quarter 1, 40,000 bags; quarter 2, 56,000 bags. Selling price is \$60 per bag.
2. Direct materials: each bag of Snare requires 4 pounds of Gumm at a cost of \$3.80 per pound and 6 pounds of Tarr at \$1.50 per pound.
3. Desired inventory levels:

| <u>Type of Inventory</u> | <u>January 1</u> | <u>April 1</u> | <u>July 1</u> |
|--------------------------|------------------|----------------|---------------|
| Snare (bags) | 8,000 | 15,000 | 18,000 |
| Gumm (pounds) | 9,000 | 10,000 | 13,000 |
| Tarr (pounds) | 14,000 | 20,000 | 25,000 |

4. Direct labor: direct labor time is 15 minutes per bag at an hourly rate of \$16 per hour.
5. Selling and administrative expenses are expected to be 15% of sales plus \$175,000 per quarter.
6. Interest expense is \$100,000 for the two quarters.
7. Income taxes are expected to be 30% of income before income taxes.

Your assistant has prepared two budgets: (1) the manufacturing overhead budget shows expected costs to be 125% of direct labor cost, and (2) the direct materials budget for Tarr shows the cost of Tarr purchases to be \$297,000 in quarter 1 and \$439,500 in quarter 2.

Instructions

Prepare the budgeted multiple-step income statement for the first 6 months and all required operating budgets by quarters. (*Note:* Use variable and fixed in the selling and administrative expense budget.) Do not prepare the manufacturing overhead budget or the direct materials budget for Tarr.

Prepare a cash budget.

Cash Budget

- Shows anticipated cash flows
- Important output in preparing financial budgets
- Contains three sections:
 - Cash Receipts (المقبوضات النقدية)
 - Cash Disbursements (المدفوعات النقدية)
 - Financing (التمويل)
- Shows beginning and ending cash balances

Cash Budget

ANY COMPANY Cash Budget

| | |
|---|------------------------|
| Beginning cash balance | \$ X,XXX |
| Add: Cash receipts (itemized) | <u>X,XXX</u> |
| Total available cash | X,XXX |
| Less: Cash disbursements (itemized) | <u>X,XXX</u> |
| Excess (deficiency) of available cash over cash disbursements | X,XXX |
| Financing | X,XXX |
| Net income | <u><u>\$ X,XXX</u></u> |

Prepare a cash budget.

Danner Company expects to have a cash balance of \$45,000 on January 1, 2020. Relevant monthly budget data for the first 2 months of 2020 are as follows. Collections from customers: January \$85,000, February \$150,000. Payments for direct materials: January \$50,000, February \$75,000. Direct labor: January \$30,000, February \$45,000. Wages are paid in the month they are incurred. Manufacturing overhead: January \$21,000, February \$25,000. These costs include depreciation of \$1,500 per month. All other overhead costs are paid as incurred. Selling and administrative expenses: January \$15,000, February \$20,000. These costs are exclusive of depreciation. They are paid as incurred. Sales of marketable securities in January are expected to realize \$12,000 in cash. Danner Company has a line of credit at a local bank that enables it to borrow up to \$25,000. The company wants to maintain a minimum monthly cash balance of \$20,000.

Instructions : Prepare a cash budget for January and February

DANNER COMPANY
Cash Budget
For the Two Months Ending February 28, 2020

E22.18 (LO 4) Service Green Landscaping Inc. is preparing its budget for the first quarter of 2020. The next step in the budgeting process is to prepare a cash receipts schedule and a cash payments schedule. To that end the following information has been collected.

Clients usually pay 60% of their fee in the month that service is performed, 30% the month after, and 10% the second month after receiving service.

Actual service revenue for 2019 and expected service revenues for 2020 are November 2019, \$80,000; December 2019, \$90,000; January 2020, \$100,000; February 2020, \$120,000; and March 2020, \$140,000.

Purchases of landscaping supplies (direct materials) are paid 60% in the month of purchase and 40% the following month. Actual purchases for 2019 and expected purchases for 2020 are December 2019, \$14,000; January 2020, \$12,000; February 2020, \$15,000; and March 2020, \$18,000.

Instructions

- a. Prepare the following schedules for each month in the first quarter of 2020 and for the quarter in total:
 1. Expected collections from clients.
 2. Expected payments for landscaping supplies.
- b. Determine the following balances at March 31, 2020:
 1. Accounts receivable.
 2. Accounts payable.

GREEN LANDSCAPING INC.
Schedule of Expected Payments for Landscaping Supplies
For the Quarter Ending March 31, 2020

| | January | February | March | Quarter |
|-----------------------|----------------|-----------------|--------------|----------------|
| December | 5600 | | | |
| January | 7200 | 4800 | | |
| February | | 9000 | 6000 | |
| March | | | 10800 | |
| Total payments | | | | |

$$(120000 * 10\%) + (140000 * 40\%) = 68000$$

Accounting receivable

$$(18000 * 40\%) = 7200$$

Accounting payable

Managerial Accounting 2

Master Budget

اعداد

د. حسين كريم الشمري

P22.4A (LO 4) Colter Company prepares monthly cash budgets. Relevant data from operating budgets for 2020 are as follows.

| | <u>January</u> | <u>February</u> |
|-------------------------------------|----------------|-----------------|
| Sales | \$360,000 | \$400,000 |
| Direct materials purchases | 120,000 | 125,000 |
| Direct labor | 90,000 | 100,000 |
| Manufacturing overhead | 70,000 | 75,000 |
| Selling and administrative expenses | 79,000 | 85,000 |

All sales are on account. Collections are expected to be 50% in the month of sale, 30% in the first month following the sale, and 20% in the second month following the sale. Sixty percent (60%) of direct materials purchases are paid in cash in the month of purchase, and the balance due is paid in the month following the purchase. All other items above are paid in the month incurred except for selling and administrative expenses that include \$1,000 of depreciation per month.

Other data:

1. Credit sales: November 2019, \$250,000; December 2019, \$320,000.
2. Purchases of direct materials: December 2019, \$100,000.
3. Other receipts: January—collection of December 31, 2019, notes receivable \$15,000; February—proceeds from sale of securities \$6,000.
4. Other disbursements: February—payment of \$6,000 cash dividend.

The company's cash balance on January 1, 2020, is expected to be \$60,000. The company wants to maintain a minimum cash balance of \$50,000.

Instructions

- a. Prepare schedules for (1) expected collections from customers and (2) expected payments for direct materials purchases for January and February.
- b. Prepare a cash budget for January and February in columnar form.

توضيح المقبوضات

| الاشهر | | | | |
|--------|-------------------------------|-----|--|--|
| | نفس شهر البيع | %50 | | |

Capital Budgeting

اعداد

د. حسين كريم الشمري

Describe capital budgeting inputs and apply the cash payback technique.

For purposes of capital budgeting, **estimated cash inflows and outflows are the preferred inputs.**

Why?

Ultimately, the value of all financial investments is determined by the value of cash flows received and paid.

Cost Flow Information

Typical cash flows relating to capital budgeting

Cash Outflows

Initial investment

Repairs and maintenance

Increased operating costs

Overhaul of equipment

Cash Inflows

Proceeds from sale of old equipment

Increased cash received from customers

Reduced cash outflows related to operating costs

Salvage value of equipment

Illustrative Data

Stewart Shipping Company is considering an investment of \$130,000 in new equipment.

| | |
|-----------------------------------|------------------|
| Initial investment | \$130,000 |
| Estimated useful life | 10 years |
| Estimated salvage value | - 0 - |
| Estimated annual cash flows | |
| Cash inflows from customers | \$200,000 |
| Cash outflows for operating costs | <u>176,000</u> |
| Net annual cash flow | <u>\$ 24,000</u> |

Cash Payback

Cash payback formula

Cash payback technique identifies time period required to recover cost of capital investment from net annual cash inflow produced by investment.

Cash payback period for Stewart is ...

$$\begin{array}{ccccc} \text{Cost of Capital} & & \text{Net Annual} & & \text{Cash Payback} \\ \text{Investment} & \div & \text{Cash Flow} & = & \text{Period} \\ \$130,000 & \div & \$24,000 & = & 5.42 \text{ years} \end{array}$$

Cash Payback

Evaluation of project

Shorter payback period = More attractive investment

In case of uneven net annual cash flows, company determines cash payback period when:

$$\begin{array}{ccc} \text{Cumulative net} & & \text{Cost of} \\ \text{cash flows from} & = & \text{investment} \\ \text{investment} & & \end{array}$$

Cash Payback

Cash payback period-unequal cash flows

Illustration: Chen Company proposes an investment in a new website that is estimated to cost \$300,000.

| <u>Year</u> | <u>Investment</u> | <u>Net Annual Cash Flows</u> | <u>Cumulative Net Cash Flow</u> |
|-------------|-------------------|----------------------------------|-------------------------------------|
| 0 | \$300,000 | | |
| 1 | | \$60,000 | \$60,000 |
| 2 | | 90,000 | 150,000 |
| 3 | | 90,000 | 240,000 |
| 4 | | 120,000 | 360,000 |
| 5 | | 100,000 | 460,000 |

Cash payback period = 3.5 years

DO IT! 1 Cash Payback Period

Watertown Paper Corporation is considering adding another machine for the manufacture of corrugated cardboard. The machine would cost \$900,000. It would have an estimated life of 6 years and no salvage value. The company estimates that annual cash inflows would increase by \$400,000 and that annual cash outflows would increase by \$190,000.

Compute the cash payback period.

| | |
|--------------------------------|------------------|
| Estimated annual cash inflows | \$400,000 |
| Estimated annual cash outflows | <u>190,000</u> |
| Net annual cash flow | <u>\$210,000</u> |

$$\text{Cash payback period} = \frac{\$900,000}{\$210,000} = \mathbf{4.3 \text{ years}}$$

Managerial Accounting 2

Capital Budgeting

اعداد

د. حسين كريم الشمري

Use the net present value method.

Discounted cash flow technique:

- Generally recognized as best approach
- Considers both estimated total cash inflows and time value of money
- Two methods:
 - **Net present value (NPV)**
 - **Internal rate of return (IRR)**

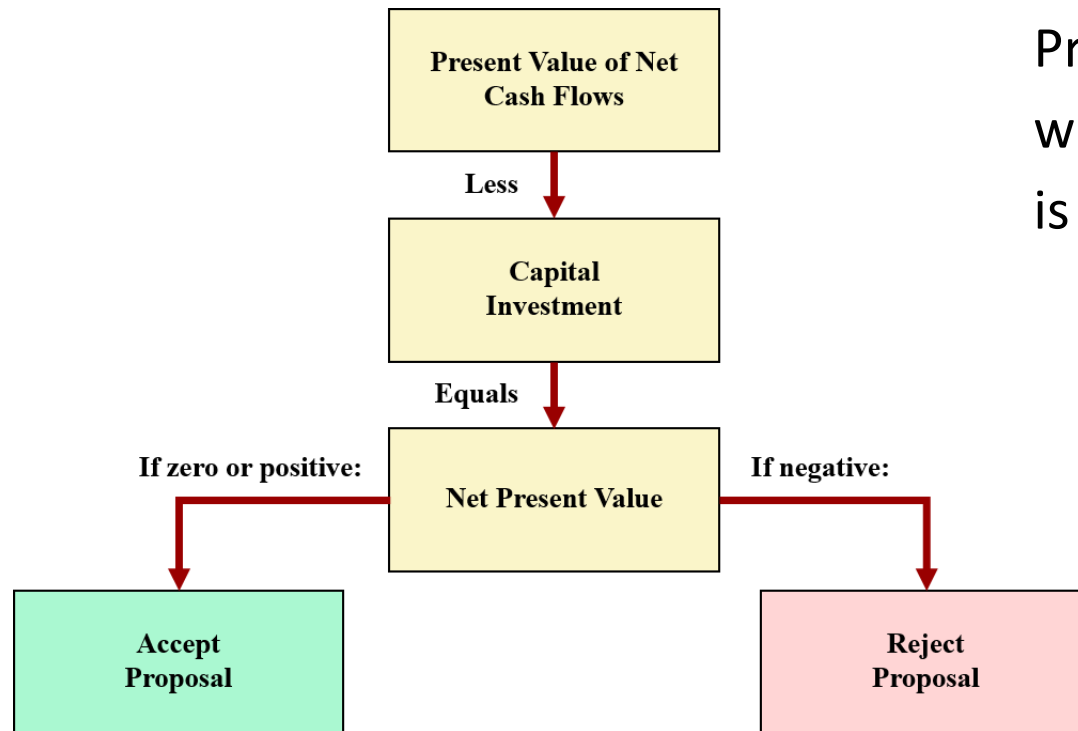

Net Present Value Method

- Cash inflows are discounted to their present value and then compared with capital outlay required by investment
- Interest rate used in discounting is required minimum rate of return
- Proposal is acceptable when NPV is zero or positive
- Higher positive NPV, more attractive investment

Net Present Value Method

Net present value decision criteria

معايير قرار صافي القيمة الحالية

Proposal is acceptable when net present value is zero or positive.

Equal Annual Cash Flows

Present value of equal net annual cash flows

Illustration: In the Stewart Shipping Company example the company's net annual cash flows are \$24,000. If we assume this amount **is uniform over the asset's useful life**, we can compute the present value of the net annual cash flows.

Capital investment \$130,000

| | |
|----------------------------------|------------------------------|
| | Present Value |
| | at 12% |
| Discounted factor for 10 periods | <hr/> 5.65022 <hr/> |
| Present value of net cash flows: | |
| $\$24,000 \times 5.65022$ | <hr/> \$135,605 <hr/> |

Equal Annual Cash Flows

Net present value-equal net annual cash flows

Illustration: Calculate the net present value.

| | |
|---------------------------------|-----------------|
| | 12% |
| | <hr/> |
| Present value of net cash flows | \$135,605 |
| Less: Capital investment | 130,000 |
| | <hr/> |
| Net present value | \$ 5,605 |
| | <hr/> |

Proposed capital expenditure is **acceptable** at a required rate of return of 12% because the **net present value is positive**.

Unequal Annual Cash Flows

Illustration

Stewart Shipping Company expects the same total net cash flows of \$240,000 over the life of the investment. Because of a declining market demand for the new product the net annual cash flows are higher in the early years and lower in the later years.

The present value of the net annual cash flows is calculated as follows.

Unequal Annual Cash Flows

Present value of unequal annual cash flows

| Year | Assumed Net Annual Cash Flows | Discount Factor 12% | Present Value 12% |
|------|----------------------------------|------------------------|-------------------|
| | (1) | (2) | (1) × (2) |
| 1 | \$34,000 | 0.89286 | \$30,357 |
| 2 | 30,000 | 0.79719 | 23,916 |
| 3 | 27,000 | 0.71178 | 19,218 |
| 4 | 25,000 | 0.63552 | 15,888 |
| 5 | 24,000 | 0.56743 | 13,618 |
| 6 | 22,000 | 0.50663 | 11,146 |
| 7 | 21,000 | 0.45235 | 9,499 |
| 8 | 20,000 | 0.40388 | 8,078 |
| 9 | 19,000 | 0.36061 | 6,852 |
| 10 | 18,000 | 0.32197 | 5,795 |
| | \$240,000 | | \$144,367 |

Unequal Annual Cash Flows

Net present value-unequal annual cash flows

Illustration: Calculate the net present value.

| | |
|---------------------------------|------------------|
| | 12% |
| Present value of net cash flows | \$144,367 |
| Less: Capital investment | 130,000 |
| Net present value | \$ 14,367 |

Proposed capital expenditure is **acceptable** at a required rate of return of 12% because the **net present value is positive**.

Comprehensive Example

Investment information for Best Taste Foods

Best Taste Foods is considering investing in new equipment to produce fat-free snack foods.

| | |
|--|-------------|
| Initial investment | \$1,000,000 |
| Cost of equipment overhaul in 5 years | \$200,000 |
| Salvage value of equipment in 10 years | \$20,000 |
| Cost of capital (discount rate) | 15% |
| Estimated annual cash flows | |
| Cash inflows received from sales | \$500,000 |
| Cash outflows for cost of goods sold | \$200,000 |
| Maintenance costs | \$30,000 |
| Other direct operating costs | \$40,000 |

Comprehensive Example

Computation of net annual cash flow

Compute the net annual cash flows for this project.

| | |
|--------------------------------------|--------------------------|
| Cash inflows received from sales | \$ 500,000 |
| Cash outflows for cost of goods sold | (200,000) |
| Maintenance costs | (30,000) |
| Other direct operating costs | (40,000) |
| Net annual cash flow | <u>\$ 230,000</u> |

Comprehensive Example

NPV of Best Taste Foods investment

Compute the net present value for this proposed investment.

| Event | Time Period | Cash Flow | × | 15% Discount Factor | = | Present Value |
|--------------------------|-------------|------------|---|---------------------|---|-------------------------|
| Net annual cash flow | 1-10 | \$ 230,000 | | 5.01877 | | \$1,154,317 |
| Salvage value | 10 | 20,000 | | .24719 | | 4,944 |
| Less: Equipment purchase | 0 | 1,000,000 | | 1.00000 | | 1,000,000 |
| Less: Equipment overhaul | 5 | 200,000 | | .49718 | | 99,436 |
| Net present value | | | | | | <u>\$ 59,825</u> |

DO IT! 2: Net Present Value

Problem data

Watertown Paper Corporation is considering adding another machine for the manufacture of corrugated cardboard. The machine would cost \$900,000. It would have an estimated life of 6 years and no salvage value. The company estimates that annual cash inflows would increase by \$400,000 and that annual cash outflows would increase by \$190,000. Management has a required rate of return of 9%.

Calculate the net present value on this project and discuss whether it should be accepted.

DO IT! 2: Net Present Value Solution

Calculate the net present value on this project and discuss whether it should be accepted.

| | |
|--------------------------------|------------------|
| Estimated annual cash inflows | \$400,000 |
| Estimated annual cash outflows | <u>190,000</u> |
| Net annual cash flow | <u>\$210,000</u> |

| | Cash Flow | 9% Discount Factor | Present Value |
|--|------------------|---------------------------|----------------------|
| Present value of net annual cash flows | \$210,000 | 4.48592 | \$942,043 |
| Less: Capital investment | | | <u>900,000</u> |
| Net present value | | | <u>\$42,043</u> |

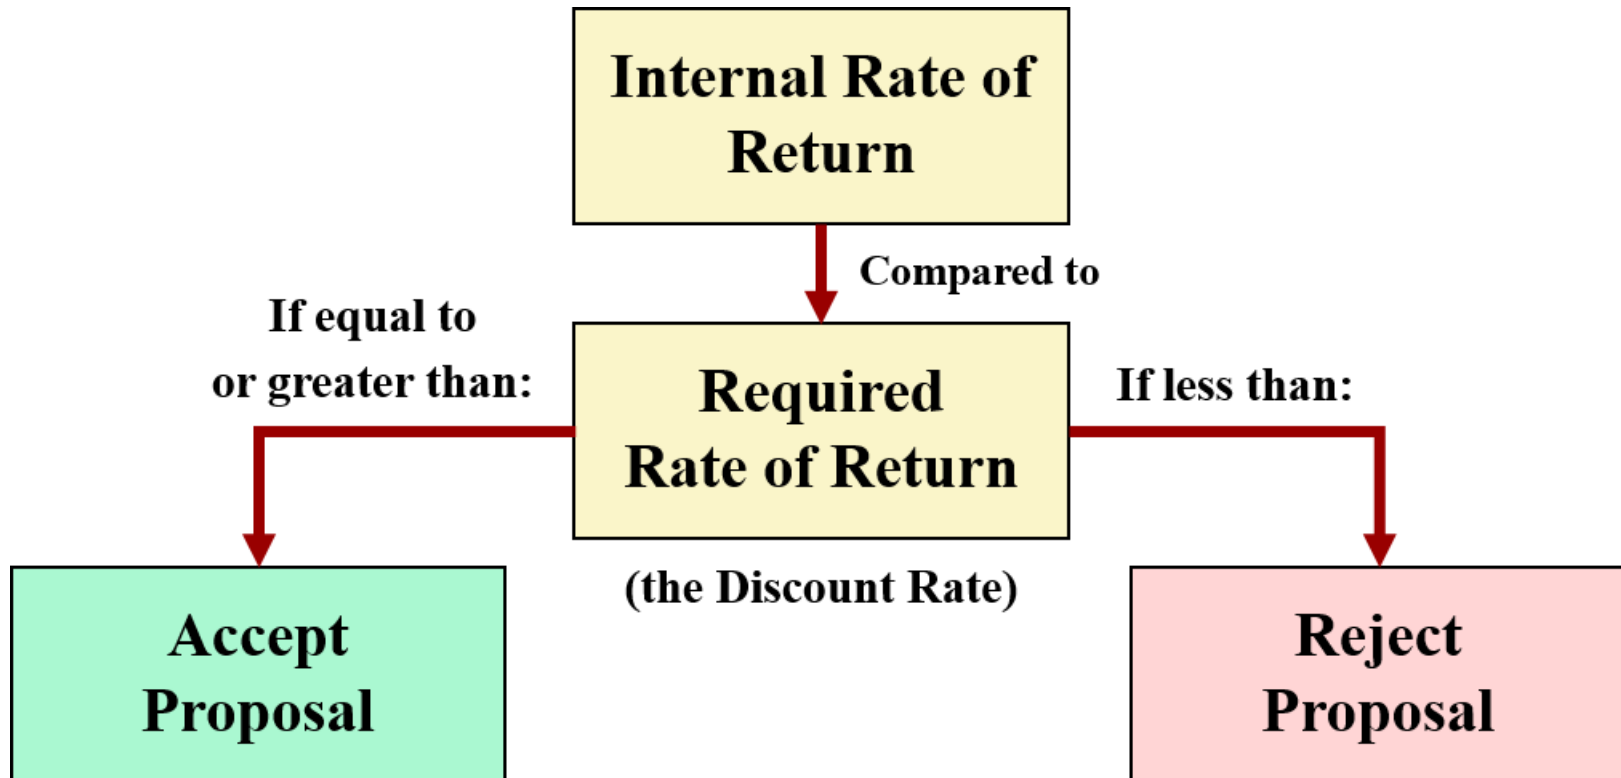

NPV is greater than zero, Waterton should accept the project.

Use the internal rate of return method.

- Differs from net present value method in that it finds interest yield of potential investment
- **Internal rate of return (IRR)** - interest rate that will cause present value of proposed capital expenditure to equal present value of expected net annual cash flows (NPV equal to zero)
- How does one determine internal rate of return?

Internal Rate of Return

Internal rate of return decision criteria

Comparing Discounted Cash Flow Methods

| | Net Present Value | Internal Rate of Return |
|------------------|---|--|
| 1. Objective | Compute net present value (a dollar amount). | Compute internal rate of return (a percentage) |
| 2. Decision Rule | <p>If net present value is zero or positive, accept the proposal.</p> <p>If net present value is negative, reject the proposal.</p> | <p>If internal rate of return is equal to or greater than the required rate of return, accept the proposal.</p> <p>If internal rate of return is less than the required rate of return, reject the proposal.</p> |

DO IT! 4: Internal Rate of Return

Problem data

Watertown Paper Corporation is considering adding another machine for the manufacture of corrugated cardboard. The machine would cost \$900,000. It would have an estimated life of 6 years and no salvage value. The company estimates that annual cash inflows would increase by \$400,000 and that annual cash outflows would increase by \$190,000.

Management has a required rate of return of 9%.

Calculate the internal rate of return on this project and discuss whether it should be accepted.

DO IT! 4: Internal Rate of Return

Calculation of the internal rate of return

| | |
|--------------------------------|--------------------|
| Estimated annual cash inflows | \$400,000 |
| Estimated annual cash outflows | <u>190,000</u> |
| Net annual cash flow | <u>\$210,000</u> |
| Machine cost | \$900,000 |
| Net annual cash flow | <u>÷ \$210,000</u> |
| Present value factor | 4.28571 |

Now, find the rate that corresponds to the present value factor.

DO IT! 4: Internal Rate of Return

Rate for pv factor of 4.28571 for 6 periods

Table 4
Present Value of an Annuity of 1

| Period | 4% | 5% | 6% | 7% | 8% | 9% | 10% | 11% |
|--------|---------|---------|---------|---------|---------|---------|---------|---------|
| 1 | 0.96154 | 0.95238 | 0.94340 | 0.93458 | 0.92593 | 0.91743 | 0.90909 | 0.90090 |
| 2 | 1.88609 | 1.85941 | 1.83339 | 1.80802 | 1.78326 | 1.75911 | 1.73554 | 1.71252 |
| 3 | 2.77509 | 2.72325 | 2.67301 | 2.62432 | 2.57710 | 2.53129 | 2.48685 | 2.44371 |
| 4 | 3.62990 | 3.54595 | 3.46511 | 3.38721 | 3.31213 | 3.23972 | 3.16987 | 3.10245 |
| 5 | 4.45182 | 4.32948 | 4.21236 | 4.10020 | 3.99271 | 3.88965 | 3.79079 | 3.69590 |
| 6 | 5.24214 | 5.07569 | 4.91732 | 4.76654 | 4.62288 | 4.48592 | 4.35526 | 4.23054 |
| 7 | 6.00205 | 5.78637 | 5.58238 | 5.38929 | 5.20637 | 5.03295 | 4.86842 | 4.71220 |

Required rate of return is only 9%, project should be accepted.

q1

Doug's Custom Construction Company is considering three new projects, each requiring an equipment investment of \$22,000. Each project will last for 3 years and produce the following net annual cash flows.

| Year | AA | BB | CC |
|-------|---------|----------|---------|
| 1 | 7000 \$ | 10000 \$ | 13000\$ |
| 2 | 9000 | 10000 | 12000 |
| 3 | 12000 | 10000 | 11000 |
| TOTAL | 28000 | 30000 | 36000 |

The equipment's salvage value is zero, and Doug uses straight-line depreciation. Doug will not accept any project with a cash payback period over 2 years. Doug's required rate of return is 12%.

Instructions

- a. Compute each project's payback period, indicating the most desirable project and the least desirable project using this method.
- b. Compute the net present value of each project. Does your evaluation change?

A

AA

| Year | Net Annual Cash Flow | Cumulative Net Cash Flow |
|------|----------------------|--------------------------|
| 1 | 7000 | 7000 |
| 2 | 9000 | 16000 |
| 3 | 12000 | 28000 |

**Cash payback period = $2 + 6000 / 12000$
= 2.5**

A

| Net present value | | | 7003 |

Bruno Corporation is involved in the business of injection molding of plastics. It is considering the purchase of a new computer-aided design and manufacturing machine for \$430,000. The company believes that with this new machine it will improve productivity and increase quality, resulting in an increase in net annual cash flows of \$101,000 for the next 6 years. Management requires a 10% rate of return on all new investments

Instructions

Calculate the internal rate of return on this new machine. Should the investment be accepted?

When net annual cash flows are expected to be equal, the internal rate of return can be approximated by dividing the capital investment by the net annual cash flows to determine the discount factor, and then locating this discount factor on the present value of an annuity table.

capital investment / net annual cash flows

$$\text{\$430,000/\$101,000} = 4.25743$$

By tracing across on the 6–year row, we see that the discount factor for 11% is 4.23054. Thus, the internal rate of return on this project is approximately 11% Since this is above the company’s required rate of return, the project should be accepted

Use the annual rate of return method

Indicates profitability of a capital expenditure by dividing expected annual net income by average investment.

$$\frac{\text{Expected Annual Net Income}}{\text{Average Investment}} = \text{Annual Rate of Return}$$

Annual Rate of Return

Problem data

Watertown Paper Corporation is considering adding another machine for the manufacture of corrugated cardboard. The machine would cost \$900,000. It would have an estimated life of 6 years and no salvage value. The company estimates that annual revenues would increase by \$400,000 and that annual expenses excluding depreciation would increase by \$190,000. It uses the straight-line method to compute depreciation expense. Management has a required rate of return of 9%.

Compute the annual rate of return.

Annual Rate of Return Solution

Compute the annual rate of return.

| | | |
|--|----------------|------------------|
| Revenues | | \$400,000 |
| Less: | | |
| Expenses (excluding depreciation) | \$190,000 | |
| Depreciation expense (\$900,000 ÷ 6 years) | <u>150,000</u> | <u>340,000</u> |
| Annual net income | | <u>\$ 60,000</u> |

$$\text{Average investment} = \frac{(\$900,000 + \$0)}{2} = \$450,000.$$

$$\text{Annual rate of return} = \frac{\$60,000}{\$450,000} = 13.3\%.$$

The proposed project is **acceptable**.

TABLE 3 Present Value of 1

| (n) Periods | 4% | 5% | 6% | 7% | 8% | 9% | 10% | 11% | 12% | 15% |

Capital Budgeting

اعداد

د. حسين كريم الشمري

E25.10 (LO 1, 2, 5) Vilas Company is considering a capital investment of \$190,000 in additional productive facilities. The new machinery is expected to have a useful life of 5 years with no salvage value. Depreciation is by the straight-line method. During the life of the investment, annual net income and net annual cash flows are expected to be \$12,000 and \$50,000, respectively. Vilas has a 12% cost of capital rate, which is the required rate of return on the investment.

Instructions

(Round to two decimals.)

- Compute (1) the cash payback period and (2) the annual rate of return on the proposed capital expenditure.
- Using the discounted cash flow technique, compute the net present value.

E25.11 (LO 1, 2, 5) Drake Corporation is reviewing an investment proposal. The initial cost is \$105,000. Estimates of the book value of the investment at the end of each year, the net cash flows for each year, and the net income for each year are presented in the schedule below. All cash flows are assumed to take place at the end of the year. The salvage value of the investment at the end of each year is assumed to equal its book value. There would be no salvage value at the end of the investment's life.

| Investment Proposal | | | |
|---------------------|------------|-------------------|-------------------|
| Year | Book Value | Annual Cash Flows | Annual Net Income |
| 1 | \$70,000 | \$45,000 | \$10,000 |
| 2 | 42,000 | 40,000 | 12,000 |
| 3 | 21,000 | 35,000 | 14,000 |
| 4 | 7,000 | 30,000 | 16,000 |
| 5 | 0 | 25,000 | 18,000 |

Drake Corporation uses an 11% target rate of return for new investment proposals.

Instructions

- What is the cash payback period for this proposal?
- What is the annual rate of return for the investment?
- What is the net present value of the investment?

EXERCISE 25-10 /A 1

BB-

$$\frac{\text{Cost of Capital Investment}}{\text{Net Annual Cash Flow}} = \text{Cash Payback Period}$$

$$190000 / 50000 = 3.8 \text{ YEARS}$$

EXERCISE 25-10 /A 2

$$\begin{array}{ccccc} \text{Expected Annual} & & \text{Average} & & \text{Annual Rate} \\ \text{Net Income} & \div & \text{Investment} & = & \text{of Return} \end{array}$$

$$A . I = (190000 + 0) / 2 = 95000$$

$$\begin{aligned} A R R &= 12000 / 95000 * 100\% \\ &= 12.63 \% \end{aligned}$$

EXERCISE 25-10 /B

B-

| | Present Value 12% |
|----------------------------------|----------------------|
| Discounted factor for 5 periods | 3.60478 |
| Present value of net cash flows: | |
| 50000*3.60478 | 180239 |
| Less: Investment | 190000 |
| N p v | (9761) |

EXERCISE 25-11 /A

| Year | Net Annual Cash Flow | Cumulative Net Cash Flow |
|------|----------------------|--------------------------|
| 1 | 45000 | 45000 |
| 2 | 40000 | 85000 |
| 3 | 35000 | 120000 |
| 4 | 30000 | 150000 |
| 5 | 25000 | 175000 |

**Cash payback period = $2 + (20000 / 35000)$
= 2.57 years**

EXERCISE 25-11 /b

$$\frac{\text{Expected Annual Net Income}}{\text{Average Investment}} = \text{Annual Rate of Return}$$

إذا كان معدل العائد السنوي (ARR) غير منتظم

أولاً : صافي الدخل (net income) نقوم بجمع صافي الدخل السنوي للسنوات ويتم تقسيمه على عدد السنوات (10000
$$= 5 / (18000 + 16000 + 14000 + 12000 + 14000)$$

ثانياً : متوسط كلفة الاستثمار (Average investment)
$$52500 = 2 / (0 + 105000)$$

$$ARR = 14000 / 52500 * \%100$$
$$= 26.67\%$$

EXERCISE 25-11 /c

C

| Year | Cash Flow | Discount Factor | Present Value |
|---------------------|-----------|-----------------|---------------|
| 1 | 45000 | .90090 | 40541 |
| 2 | 40000 | .81162 | 32465 |
| 3 | 35000 | .73119 | 25592 |
| 4 | 30000 | .65873 | 19762 |
| 5 | 25000 | .59395 | 14836 |
| Total present value | | | 133196 |
| Less: Investment | | | 105000 |
| Net present value | | | 28196 |

P25.1A (LO 1, 2, 5) U3 Company is considering three long-term capital investment proposals. Each investment has a useful life of 5 years. Relevant data on each project are as follows.

| | <u>Project Bono</u> | <u>Project Edge</u> | <u>Project Clayton</u> |
|--------------------|---------------------|---------------------|------------------------|
| Capital investment | \$160,000 | \$175,000 | \$200,000 |
| Annual net income: | | | |
| Year 1 | 14,000 | 18,000 | 27,000 |
| 2 | 14,000 | 17,000 | 23,000 |
| 3 | 14,000 | 16,000 | 21,000 |
| 4 | 14,000 | 12,000 | 13,000 |
| 5 | 14,000 | 9,000 | 12,000 |
| Total | <u>\$ 70,000</u> | <u>\$ 72,000</u> | <u>\$ 96,000</u> |

Depreciation is computed by the straight-line method with no salvage value. The company's cost of capital is 15%. (Assume that cash flows occur evenly throughout the year.)

Instructions

- a. Compute the cash payback period for each project. (Round to two decimals.)
 - b. Compute the net present value for each project. (Round to nearest dollar.)
 - c. Compute the annual rate of return for each project. (Round to two decimals.) (*Hint: Use average annual net income in your computation.*)
 - d. Rank the projects on each of the foregoing bases. Which project do you recommend?
-

Project Bono

BB-

$$\frac{\text{Cost of Capital Investment}}{\text{Net Annual Cash Flow}} = \text{Cash Payback Period}$$

Depreciation(الاندثار) = $160000 / 5 = 32000$

التدفق النقدي = صافي الدخل + الاندثار

$$160000 / (14000 + 32000) = 3.48 \text{ years}$$

Project Edge

Depreciation(الاندثار) = $175000 / 5 = 35000$

| Year | Net Annual Cash Flow | Cumulative Net Cash Flow |
|------|---------------------------|--------------------------|
| 1 | $(18000 + 35000) = 53000$ | 53000 |
| 2 | $(17000 + 35000) = 52000$ | 105000 |
| 3 | $(16000 + 35000) = 51000$ | 156000 |
| 4 | $(12000 + 35000) = 47000$ | 203000 |
| 5 | $(9000 + 35000) = 44000$ | 247000 |

Cash payback period = $3 + (19000 / 47000) = 3.40$

Project Clayton

Depreciation(الاندثار) = $200000 / 5 = 40000$

| Year | Net Annual Cash Flow | Cumulative Net Cash Flow |
|------|--------------------------|--------------------------|
| 1 | $(27000 + 40000)=67000$ | 67000 |
| 2 | $(23000 + 40000)= 63000$ | 130000 |
| 3 | $(21000 + 40000)= 61000$ | 191000 |
| 4 | $(13000 + 40000)= 53000$ | 244000 |
| 5 | $(12000 + 40000)= 52000$ | 296000 |

**Cash payback period = $3 + (9000/ 53000)$
=3.17**
